A cross-sectional view of a multi-layered rectangular structure. The structure consists of a central white rectangular core, surrounded by a hatched layer (3), which is further enclosed by a solid black border (4). The total height of the structure is labeled 'a' on the right. The height of the central core is labeled 'b'. The height of the hatched layer (3) is labeled 'c'. The height of the solid black border (4) is labeled 'd'. The width of the structure is labeled '4b' at the top and bottom. The label '3b' is also present at the top and bottom, indicating the width of the hatched layer (3). The label '2' is at the top right, with a curved arrow pointing to the top surface of the structure.
